

Zenith Drawer Box Removal & Replacement

Easily remove your Zenith drawer boxes without releasing any clips or the need for any tools.

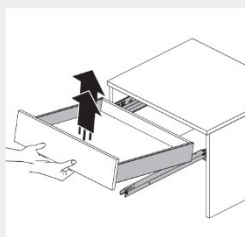

[Click here for the full adjustments video.](#)

1) Open The Drawer

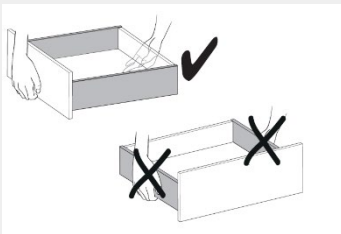

- Fully open the drawer to the full extension point.

2) Gently Pull Up

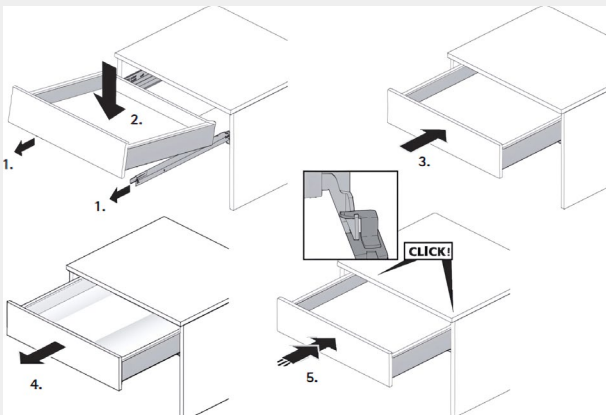

- Grab the drawer front bottom and pull up on the front in a gentle but firm upwards motion.
- There will be a loud, audible click noise.
- This will release the drawer box from the glides/runners.

Safe Handling & Storage

- Handle the drawer box and front from the front and back,
- Do not handle it by holding on the sides only.
- Always lay them down on a clean, soft blanket or towel.
- Only store them with the cabinet fronts facing up.
- Do not store them on their sides.

Replacement

- At an angle, gently place the drawer box on both runners from above.
- Lay the box flat on the runners.
- Close the drawer all the way and push in until there is a loud, audible click noise.
- The catch automatically locks the drawer into place.
